

YASH PANDIT [Immediate Joiner]

Team Lead | Project Manager | Angular | React | Python FastAPI | AI/LLM Integration

 Portfolio  Github  LinkedIn  yashpandit343@gmail.com  +91 8867642126  Bangalore - 560100

PROFESSIONAL SUMMARY

Technical Project Manager and Full Stack Engineer with close to 6 years of experience delivering enterprise software solutions across web, cloud, and AI domains. Proven track record of leading cross-functional teams, managing end-to-end project lifecycles, coordinating stakeholders, and driving Agile delivery for business-critical initiatives. Combines deep expertise in Angular, React, Python FastAPI, cloud platforms, and LLM-based applications with strong project planning, risk management, and execution skills to deliver scalable solutions on time and aligned with business goals.

TECHNICAL SKILLS

Project Management — Jira, Confluence, Trello, Clickup, Excel, Notion, Google Calender, Zoom, Google Sheets.

Frontend — React, Angular (v2-17), NgRx, Javascript, Typescript, HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Context API, Redux, Leaflet maps, ArcGIS, Pdftron, Angular Material, Chakra UI, Highcharts, SyncFusion, PrimeNG

Backend — Python, FastAPI, REST API Design, Paraquet, GeoJSON, GPKG, JSON

AI/LLM — LangGraph, LLM Integration(Ollama, Gemini API), Embeddings, RAG, Agents, Context Window management, Multi-Model Architecture, Prompt Engineering, AI Application Development, Document AI Pipelines

Tools — Cursor AI, VS Code, Git/Github, ChatGPT

Architecture — Cloudflare, AWS cloud services (EC2, Lambda, RDS, S3), CI/CD pipelines, GitHub Actions, Docker.

EXPERIENCE

Systems Integration Senior Specialist, NTT Data

10/2025 – Present | Bengaluru

- Architected and delivered enterprise-scale full-stack applications using **React, Angular, TypeScript, Python FastAPI, and PostgreSQL**, building scalable, maintainable solutions from frontend through backend services.
- Designed and developed RESTful APIs, microservices, and data processing pipelines using **Python FastAPI**, collaborating closely with frontend teams to deliver high-performance, business-critical applications.
- Built and integrated enterprise-grade APIs across multiple internal and third-party systems, streamlining data exchange, automating workflows, and improving system interoperability.
- Engineered an AI-powered RFP automation platform using **Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), vector databases, embeddings, and agentic AI workflows**, significantly improving proposal generation quality and turnaround time.
- Developed **AI evaluation pipelines** to assess the quality, accuracy, and **consistency** of LLM-generated responses by implementing **automated validation workflows, retrieval verification, semantic similarity scoring, chunk-level evaluation, and hallucination detection**, enabling continuous monitoring and improvement of AI systems.
- Implemented CI/CD pipelines and cloud deployment workflows using **GitHub Actions, AWS, Docker, and Firebase Authentication**, improving deployment reliability, release velocity, and development efficiency.
- Improved application performance by implementing asynchronous processing, parallel execution, background task orchestration, and workflow optimization, reducing AI document generation time by **over 85% (40 minutes to 5 to 7 minutes)** while significantly increasing system scalability and throughput.

Lead Software Engineer, 73 Strings

01/2024 – 10/2025 | Bengaluru

- Led the successful delivery of enterprise-scale web application initiatives, coordinating cross-functional teams to implement performance optimization strategies that improved application responsiveness by 30% and reduced page load times by 40%.
- Managed the complete project delivery lifecycle, including requirement gathering, project planning, solution design, execution, risk management, and production release, while leading technical teams to increase sprint velocity by 25%.
- Directed the organization-wide migration of three monolithic frontend applications to a Micro Frontend architecture by planning execution phases, coordinating multiple engineering teams, managing dependencies, and ensuring seamless delivery with minimal business disruption.
- Partnered with executive leadership, including the CTO and founding team, to define technology roadmaps, prioritize strategic initiatives, align engineering efforts with business goals, and drive long-term platform modernization.
- Established engineering delivery standards through technical governance, code review processes, mentoring, and collaboration, improving development quality, maintainability, and overall team productivity.
- Collaborated with product managers, UX designers, QA engineers, and business stakeholders to plan, prioritize, and deliver high-impact client-facing features ahead of schedule while maintaining quality, performance, and customer satisfaction.

Senior Software Engineer, Cloudtara Technologies

12/2020 – 12/2023 | Bangalore

- Designed and developed a library of modular, reusable UI components and shared frontend utilities, reducing feature development effort by 40% and improving application consistency across projects.
- Partnered closely with QA and DevOps teams to strengthen release processes, improve test coverage, and enhance deployment reliability, resulting in a 35% reduction in production issues.
- Developed dashboards in Angular for financial data visualization and analytics platforms, enabling more accurate business insights and improving analytical accuracy by 20%.
- Engineered Python-based data processing and automation pipelines that ingested Excel datasets, performed complex transformations, applied business rules, standardized data formats, executed advanced calculations, and generated validated output files while preserving source data integrity.
- Automated previously manual data-cleaning and reporting workflows through scalable Python scripting, significantly reducing processing time, improving data quality, and minimizing operational effort.

EDUCATION

Bachelor of Engineering (Information Science and Engineering), KLS Gogte Institute of Technology

2016 – 2020 | Belgaum
